Vikram Patni

Founder and CEO, Proventus Valuetech
Vadodara, Gujarat, India

Summary

An expert engineering and business professional with successful track record of handling operations and projects for MNCs in India and Africa. With more than 25 years of hands on experience, I specialised in technology evaluation, plant designs, commercial contracts, vendor selection, bid evaluation and execution of projects for delivering maximum values to clients to meet corporate objectives. I possess proven track record to drive operations to full capacity utilization and profitability and innovate to achieve the above results. In doing so I keep strong eyes on Healthy , Safety and Environment for benefit of all stakeholders.

Expertise: Metallurgist | Operations Management | Training and development | New Process Development | Strategic Sourcing | Strategic Planning | Installation & commissioning | Project Management | Technology evaluation | Procurement | Plant Performance Improvement

Industry: Mining | Metals | Consulting

Experience

Proventus Valuetech

Founder and CEO

September 2015 - Present (10 years 10 months)

Vadodara Area, India

We introduce ourselves as Proventus Valuetech based out of Vadodara, Gujarat in India. Proventus Valuetech is a company established by personnel having vast experience in non-ferrous metallurgy. We have vast experience smelting, leaching, SX-EW, electro-refining, electro-winning and melting of various non-ferrous metals.

Contact us for:

1. Process Development-Bench Scale/Pilot Plants
2. Basic and detailed engineering

3. Setting up cathode plant from various copper scraps.
4. Setting up rod plant from various copper scraps/cathodes.
5. Setting up leaching- SX-EW plants from various types of copper and zinc waste/by-products.
6. Designing solution for effluent streams in line with PCB requirements.
7. Tie up for technology sale/collaboration.

VINAR Innovation and Research Center Pvt LTd

Co-Founder and Director

May 2017 - August 2019 (2 years 4 months)

Vadodara Area, India

We are proud to introduce our newly established VINAR Innovation and Research Centre at Vadodara, Guj. India. VINAR is founded with an objective to provide process development & analytical services for mineral processing, metal extraction, waste treatment and recycling India. Additionally, the engineering and project management services are also offered to our customers.

Activities like E-waste treatment, Li-ion battery recycling, spent catalyst treatment will be at the top of our chart when it comes to recycling.

VINAR has established research centre at Vadodara and is continuously upgrading the facility (planned expansion - over 12 months) with high tech equipment to support the project and process development. VINAR is in process of receiving multiple Industry certifications including ISO to consistently provide quality experience to our customers. Our current scope of work for projects related to mineral processing, metal extraction and recycling includes:

- Process development – Bench Scale/Pilot Plant
- Basic and Detailed Engineering Package
- Analytical Laboratory Services
- Contract Project development
- Research and Development Project
- Partnership/Consortium/Alliances for Future R&D

Striving for excellence and to be the best in class.

Mopani Copper Mines- Glencore Group Company

Project Manager- Refinery Upgradation

May 2013 - August 2015 (2 years 4 months)

Worked as project manager for upgradation of copper refinery of 200,000 T/year capacity from conventional starter sheet technology to state of art permanent cathode technology. I was responsible for working with our technology partner (Glencore Technologies) to achieve the stipulated goals of the project. The key challenge in the project was to retrofit the modern equipment in an old infra structure with the plant being operated in full capacity. In coordination with refinery operations team and project team, we managed to complete the task in stipulated budget and time frame.

- Prepared the project report for feasibility study and approval of the management.
- Prepared the budget and execution plan for the project.
- Evaluated various available technologies and finalized the best suited one for Mopani Operations.
- Worked closely with technology partners and Mopani team to complete the project in stipulated time frame. This upgradation will substantially reduce the WIP and operating cost to give recurring benefits to the company.

Mopani Copper Mines- Glencore Group Company Refinery Superintendent

October 2010 - December 2012 (2 years 3 months)

Zambia

Managing of HR, Safety, operations, maintenance and commercial activities in 200,000 MT/year copper refinery, leach and SXEW plant.

- Achieved highest cathode production since 1993.
- Achieved highest ever cathode production for a month in the month of Oct-2010 to Dec-2010.
- Designed and commissioned 1000+ MT/annum slimes handling system.
- Achieved 100% LME grade-A cathode production.
- Achieved highest ever production of anodes slimes (15% increase in production).
- Commissioned Ni removal plant and liberator sections successfully.
- Designed and commissioned 1000 MT+/annum slime handling systems.
- Achieved 15% reduction in cost of production.

Sterlite Industries (I) Ltd, Vedanta Group Company Head smelter and acid plant operations

November 2008 - 2010 (2 years)

Tuticorin-Tamilnadu

Sterlite Industries (I) Ltd has Smelter and Sulphuric Acid Plant SBU with 400,000 MT/annum capacity, 700 + manpower and turnover of US\$ 2 bn+).

- o Achieved highest ever production for smelter SBU since inception increasing the capacity utilization from 87% to 94%.
- o Member of capital expenditure evaluation team to analyze the feasibility of proposed capital expenditures and also auditing the post commissioning benefits.
- o Coordinator for cost reduction initiative “ACE” (target cost reduction/ additional revenue of US\$ 20 Mn).

Lead the following teams:

- Reduction in converter blow time : savings of US \$ 2 Mn/year
- Improvement in copper recovery : savings of US \$ 2 Mn/year
- Optimization of bed temperature in SAP : savings of US \$ 4 Mn/year
- Optimization of oxygen plant : savings of US \$ 1 Mn/year

Active member of following teams

- Strategic sourcing : savings of US \$ 3 Mn/year
- Various initiatives on refinery : savings of US \$ 2 Mn/year

- o Member of zero cost team which achieved overall negative cost for the production of anodes by improving operating efficiencies, copper recovery and maximizing by product generations and revenues.
- o Leader of following TQM teams that achieved and exceeded the targets within the stipulated time frame:

- # Optimization of smelting operations
- # Improvement in copper recovery
- # Reduction on fuel consumption in smelter and SAP
- # Reduction in electricity consumption in smelter and SAP

- o Successfully used various new concentrates with higher impurities and thus helping the concentrate desk with more flexibility in sourcing.
- o Driven the team to achieve IMEA Super Platinum award in Manufacturing category (100+ top manufacturing companies participated for the same) and RBNQA manufacturing excellence award in the year 2009-10.
- o Responsible for achieving HSE, cost and production targets in the SBU.

Sterlite Industries (I) Limited- Vedanta Group Company
10 years

Head Production

March 2007 - October 2008 (1 year 8 months)

Silvasa- UT of D & NH, India

- Head (Production)-Silvassa (Sterlite Industries (I) Ltd, Silvassa Unit comprises copper refinery of 200,000 MT/annum capacity and CCR plant with 150,000 MT/annum capacity and a team of 400 + manpower.)
 - o Increased per day production for CCR plant from 265 MT/day to 275 MT/day thus getting additional revenue of US\$ 0.2 Mn /annum.
 - o Reduced cost of production by 5% resulting in savings of US \$ 1 Mn/annum.
 - o Achieved 7% reduction in consumption of petro products in CCR and Anode Casting Plants resulting in savings of US \$ 1 Mn/annum.
 - o Achieved IMEA Platinum award in manufacturing category in year 2008-09 (100+ top manufacturing companies participated for the same).
 - o Won first prize in QUALTECH competition in year 2007 for best TQM project in innovation category for developing Ni as byproduct from waste stream. (Selected from 120 entries from all over India in preliminary round and 8 entries in final round)
 - o Responsible for achieving HSE, cost and production targets.

Manager- Tankhouse and Before

November 1998 - February 2007 (8 years 4 months)

Silvassa- UT of D & NH, India

Sterlite Industries (I) Ltd, Silvassa Unit comprises copper refinery of 200,000 MT/annum capacity and a team of 150 + manpower.)

- o Member of teams for capacity expansion from 60,000 MT/annum to 200,000 MT/annum.
- o Developed and patented the process of producing LME grade cathodes from electro winning circuit resulting in additional revenue of US \$ 1.2 Mn/annum.
- o Lead the following teams to achieve and exceeded the set targets:
 - # Recovery of Ni from electrolyte : savings of US \$ 1.4 Mn/year
 - # Improvement in gold and silver recovery : savings of US \$ 1 Mn/year
 - # Reduction in power consumption : savings of US \$ 1 Mn/year
- o Awarded with Employee of the Month for :
 - # Increasing the plant capacity by 4% without substantial investment resulting in additional revenue of USD 42 Mn and additional profit of US \$ 3 Mn.
 - # Reducing the steam consumption from 290 Kg/MT to 80 Kg per MT resulting in savings of US \$ 1 Mn.
- o Active contribution in green field project at Tuticorin to achieve the lowest commissioning time in the world and also the lowest cost producer status.
- o Achieved the certificate of "Certified Quality Engineer" in 2005 enabling to become Quality Council Member of Sterlite Industries to review the progress of all TQM projects.

Education

Malaviya National Institute of Technology Jaipur

Bachelor of Engineering - BE, B.E. Metallurgy · (1994 - 1998)
